

Superchem 865

Ceramic Anti-Seize

SuperChem 865 is a non-carbonizing Anti-Seize lubricant which withstands high temperatures and extreme pressures. Blended of ultrafine inorganic particles and a synthetic oil base, 861 prevents galling of threaded parts and mating surfaces during assembly/ disassembly up to 1200 C (2200 F). SuperChem 861 also acts as an anodic protective treatment which helps to avoid corrosion between surfaces.
